[] Exercise

Module 2

Module 3

What will be the output of the following code?

console.log

☐ Error☒ Hello

Submit

Oops!

In this scenario, because of the missing semicolon (;), JS will print an error.

Module 2

Module 3

What will be the output of the following code?

console.log

☐ Error☒ 4☐ 9

Perfect!

You got it! Anything between the quotes (" ") is treated as a string.
